Completed Tasks:-

1. **Requirement Gathering:** We conducted comprehensive discussions with the TA's to gather their requirements, preferences, and objectives for the website.
2. **Visual Design:** The visual design phase is complete, with mockups and prototypes developed for various pages of the website. The TA's provided feedback, and necessary adjustments were made accordingly.
3. **Frontend Development:** Frontend development is underway, with HTML, CSS, and JavaScript being implemented based on the approved designs. Key frontend components, such as navigation menus and page layouts, are largely in place.
4. **Content Creation:** Content creation is in progress, with copywriting and multimedia elements being developed to populate the website.
5. **Responsive Design:** We are ensuring that the website is fully responsive, providing an optimal viewing experience across various devices and screen sizes. Testing on different devices and browsers is ongoing to address any compatibility issues.

Upcoming Tasks:

1. **Functionality Implementation:** We will continue implementing additional functionality, such as user authentication, contact forms, and interactive features, to enhance user experience and achieve the desired website objectives.
